M 2.2 i. TORs for ACE-SPED internal institutional seed grants scheme to support innovation development

AFRICA CENTRE OF EXCELLENCE FOR SUSTAINABLE POWER AND ENERGY DEVELOPMENT

(ACE-SPED)

UNIVERSITY OF NIGERIA, NSUKKA

The Center's internal institutional seed grants scheme to support innovation development

TERMS OF REFERENCE (TORS) DOCUMENT

This document lays out the terms of reference to support the centre's seed grants scheme.

Overview

ACE-SPED seed grants for sustainable energy and power development innovation will provide significant commercialization assistance to African innovators creating scalable solutions to address energy and power problems in the sub-region. The ACE-SPED seed grants for sustainable energy and power development innovation seek to encourage, honor, and promote entrepreneurship and innovation across sub-Saharan Africa

Seed Grant Policy Committee Terms of Reference

i. Identification of thermatic areas to be considered in the award of seed grants;
ii. Determination of maximum amount to be given to the awardees;
iii. Establish monitoring and evaluation protocols for the seed grant;
iv. Any other relevant issue that the committee might identify to be appropriate in the establishment of a seed grant policy for the centre

Implementation committee Terms of Reference

i. Annually call for ACE-SPED Innovation Seed Grants Submissions;
ii. Screen the submitted applications based on the ACE-SPED Seed grant policy;
iii. Organize an award ceremony for the successful applicants;
iv. Periodically monitor the progress of the fund utilization by the seed grant awardees until completion of the project;
v. Any other relevant issue that your committee might identify to ensure the successful implementation of the grants.

Approved policy document for Establishment of the Centre's internal institutional seed grants scheme to support innovation development

Overview

ACE-SPED seed grants for sustainable energy and power development innovation will provide significant commercialization assistance to African innovators creating scalable solutions to address energy and power problems in the sub-region. The ACE-SPED seed grants for sustainable energy and power development innovation seek to encourage, honor, and promote entrepreneurship and innovation across sub-Saharan Africa

Objectives

The principal aim of the ACE-SPED Innovation Seed Grants is to furnish monetary backing for research endeavours that correspond with the innovation objectives of the centre, specifically in domains like electric power system development, renewable energy, waste-to-energy conversion, energy conservation, energy management, energy resource assessment and forecasting, and sustainable energy material.

Intellectual Property Developed Under Sponsored Research Agreements

Ownership of Intellectual Property developed following the seed grant, will be governed by the provisions of the University of Nigeria, Nsukka agreement for university sponsored research and Development.

Implementation Committee

The policy provides that there shall be an implementation committee with the Terms of Reference as:

i. Annually call for ACE-SPED Innovation Seed Grants Submissions;
ii. Screen the submitted applications based on the ACE-SPED Seed grant policy;
iii. Organize an award ceremony for the successful applicants;
iv. Periodically monitor the progress of the fund utilization by the seed grant awardees until completion of the project;

Any other relevant issue that the committee might identify to ensure the successful implementation of the grants.

M 2.3 iii. Evaluation of impact of workshops.

AFRICA CENTRE OF EXCELLENCE FOR SUSTAINABLE POWER AND ENERGY DEVELOPMENT

(ACE-SPED)

UNIVERSITY OF NIGERIA, NSUKKA

EVALUATION OF IMPACT OF WORKSHOPS

The evaluation is based on the survey carried out at the end of each workshop. A total of four workshop activities are presented as shown in Table 1. A critical analysis of the survey report for all the workshops shows that all the participants were convinced that they learnt something new from the workshops eventhough the level of new information acquired varies across the workshops. Equally, all the participants asserted that the knowledge acquired from the workshop will be applied by them (while some said immediately, others said later but none said that it will never be used). This is a good pointer to the impact the workshops have made on the development of the participants. In addition to the points already observed, all the participants showed the possibility of registering for the workshop again if given the opportunity. All the participants showed that they will recommend the workshops to their colleagues which is a good pointer to the positive impact of the workshops

Table 1: Outlay of the workshop reviewed

The general comments on the workshops pull together

S/N	Please drop suggestions on how the training can be better carried out
1	More of practical in the form of hands-on should be employed in such trainings in the future.
2	There is need to create awareness of such trainings in related industries.
3	I suggest that the number of the days of the training be increased so as to accommodate those that may not catch up on time to meet up.
4	They should be giving enough time for questions and answers so that the participants can express themselves in their areas of interests.
5	There should be adequate publicity in order to get the awareness of the general public. The turnout needs to be increased. I, therefore, suggest that for betterment of future training, there should be adequate and massive publicity.
6	Resource persons that work with industries or factories of the subject area should be the ones to conduct the trainings because they have the practical knowledge of the subject matter.
7	The number of days of the training should be increased so that participants can get adequate knowledge of what is being thought.
8	There should be more publicity. Enough time should be allowed for proper dissemination of the workshop information. There should be practical workshop where what were taught are practised for further knowledge.
9	The management should seek more sponsorships to enable them extend the time of the workshop for up to one month.
10	The training can be better if it is more practical oriented. I discovered that almost the whole day was more of theoretical lecture.
11	The train should focus more on local case studies than foreign ones.

12	The training was impromptu, more awareness, therefore, should be created in the next training.
13	The workshop is recommendable. I appreciate the Centre for organizing the training. In other hand, I would suggest that the Centre provide more days for the training in their next training so that the participants gain sufficient practical knowledge.
14	In the next training, they should provide enough food for the participants. Once an individual participated, he or she should be fed well.
15	The organizers of the training should be appreciated. They should be encouraged to do more in the next training.
16	The training should be more interactive. The trainees should be given opportunities to contribute in areas they are proficient in.
17	The training should be more of practical than theory. Explicit practical demonstration and implementation of theory taught should be done for proper understanding by the participants. This training should also devise a means of having a hybrid mode of delivery. More on-ground trainers should be employed during the training. This will enable the attendees to have full knowledge.
18	Creation of awareness. They should create a medium where the training will be advertised. This will help people to know about it and participate.
19	Trainers should undergo certain trainings to enable them drive home their points easily and effectively communicate with trainees.
20	Organizers should rehearse properly next time before the event to avoid most technical hitches encountered during the training.
21	The training should be made to be computer based by using Computer Aided Instructions (CAIs), where a computer program is used to assist the participants in visualizing the concept of what is being thought.
22	The training should be more practical than theory and the management should create early awareness to enable participants prepare for the training.
23	More and more practical sessions are needed in a training of this nature.
24	The practical aspect of the training should be more standard. They should make sure that everyone that participated learnt something based on the practical aspect.
25	More awareness should be created for more participants to be involved in the training. Also, the training ought to be packaged in such a way that trainees can easily go and implement what they have learnt without external guidance.
26	More hands-on sessions should be introduced.
27	More days should be allocated to this kind of training so that participants would obtain the maximum knowledge required.
28	I appreciate the organizers of this training. They did wonderfully well.
29	The organizers should make hard copy materials available than soft copy.
30	Lecturers with practical knowledge of the subject matter should be used so that as they are teaching, they will be demonstrating along. By that audience will be seen to follow up the pace.
31	I would suggest that more practical are involved in such training.
32	More days should be provided for the training. Five days was not enough to give adequate knowledge.
33	Resource materials should be given before the training so that every trainees will scan or even go through it before starting.
34	The training should be more practical than theoretical.
35	The training was good and I encourage the management to come up with more trainings.

36	I acknowledge you people for keeping time in the workshop training and I am encouraging you people to keep it up and bringing more training.
37	There is an undisputable fact that all the trainees cannot comprehend all the lectures in a day. There is need to extend the training days from five days to at least ten days.
38	There should be more skilled trainers. I urge the organizers to employ more skilful personnel to enhance the performance of the trainees.
39	More of interactive sections should be encouraged next time to encourage trainees to share their past experiences as they learn.
40	Trainings of such kinds should be up to 80% practically based and more of interactive in nature such that trainees with experiences can relate such experiences which can be beneficial to the training as a whole.
41	The training should be a yearly event.

M 2.3 iv. Annual Report of workshop activities

AFRICA CENTRE OF EXCELLENCE FOR SUSTAINABLE POWER AND ENERGY DEVELOPMENT

(ACE-SPED)

UNIVERSITY OF NIGERIA, NSUKKA

ANNUAL REPORT OF WORKSHOP ACTIVITIES, INVITED LECTURES, WEBINARS ON TECHNOLOGY TRANSFER AND COMMERCIALIZATION

Presented in this document is the report of the 2023- 2024 annual report of workshop activities on Technology transfer and commercialization of ACE-SPED. The period under review is for four (4) quarters covering October, 2023 to September, 2024. A total of four workshop activities are presented as shown in Table 1.

S/N	Description	Date
1	Workshop on Innovation and Entrepreneurship	5th to 18th December, 2023
2	workshop on Intellectual Property, Technology Transfer, and Innovation (IPTTI)	27th to 30th February, 2024
3	A one-day Workshop on Intellectual Property	2nd April, 2024
4	ACE-SPED Professional Short Courses	1st to 5th July, 2024

Workshop on Innovation and Entrepreneurship

This workshop is held every session. For the session under review, it was held between 5th and 18th December, 2023. It was a staggered one that took place specifically on 5th, 8th, 12th, 14th and 18th. On the whole, the contacts were five days. The reason being that it gave the participants room to interact among themselves, and exchange ideas on the topics of discussion. This equally fitted into the university programme at that period being an examination period. Hence, the days were actually exam free days to a large extent. The workshop resource persons were the same as the centre's entrepreneurship course lecturers. This method gave room for firm familiarization and smooth interaction helping the students

to relate the discussion to the classroom activities. It equally gave room for non-ACE-SPED students and participants to benefit from centre's academic programmes and air their views on the subject matter based on their experience from real market world. The workshop usually commenced each day by 9 a.m. and ended by 4p.m. at CAD room of the NLNG of the faculty of Engineering of the university. The excitements that follows each day' programme is enough feedback to the impact of the workshop to the participants. The flyer, attendance sheets for the workshop and the resource persons used for the workshop are as shown in

https://acespedunn.edu.ng/about/dli-5.3-entrepreneurship/entrapreneural-workshops/61

Workshop on Intellectual property, Technology Transfer, and Innovation

The workshop/training was held between 27th and 30th February, 2024. The objectives of the workshop were to

i. Carry out sensitization campaign aimed at stimulating interest in original research geared towards promoting innovations
ii. link and match Industries, SMEs, and Private sector players with University Innovators/Inventors for mutually rewarding benefits
iii. provide adequate assistance and facilitate the process of patents acquisition on products of original research and creative activities emanating from the University
iv. facilitate the acquisition of other Intellectual property types such as copyright, trademarks and designs
v. promote the commercialization of research and development (R&D) results and products in the University
vi. Serve to midwife a seamless Technology transfer from the ACE-SPED/University/ innovators to suitable development industry partners for mutual economic benefit.

The interesting thing about this training workshop was that, it was facilitated by the very office that is in-charge of intellectual property in Nigeria (National Office for Technology Acquisition and Promotion -NOTAP). Other resource persons for the workshop included Prof. Damian C. Odimegwu, Director, IPTTO, University of Nigeria, Nsukka; Dr. Mrs. Queeneth A. Kingsley-Omoyibo, IPTTO, Igbinedion University, Okada , Edo State, Nigeria; Dr. Okechukwu Timothy Umahi, (Legal practitioner and a Lecturer in Copyright Laws at the University of Nigeria, Enugu Campus), and Prof. Gabriel Okafor of the Department of Food Science and Technology, University of Nigeria, Nsukka. The highlights of the workshop included:

vii. Overview of Intellectual Property and Innovation
viii. Benchmark Research requirements for Intellectual Property generation
ix. Intellectual Property rights and legal issues in Nigeria
x. Role of Institutional Management for Intellectual Property Generation and Exploitation

xi. The imperative/role of Intellectual Property Policy and Asset Management in enhancing inventiveness, innovation and wealth
xii. The Process of Patenting and Research

The practical session of the workshop involved

i. Practical Training 1: Patent Databases and Search Techniques
ii. Practical Training 2: Drafting of Patent Specification and Claims
iii. Practical Training 3: Documentation Procedures and Completion of Patent Forms

The three day workshop usually commenced at 9 a.m. and ended at 4p.m. each day at CAD room of the NLNG of the faculty of Engineering of the university. The excitements that follows each day' programme is enough feedback to the impact of the workshop to the participants. The flyer, resource materials, attendance sheets for the workshop, sampled photograph and certificate for the workshop are as shown in

https://acespedunn.edu.ng/about/dli-5.3-entrepreneurship/workshop-on-intellectual-property-and-technology-transfer/60

A one-day Workshop on Intellectual Property

This one day workshop which took place on 2nd April, 2024 was exclusively organized for the recipients of the ACE-SPED seed grant award scheme as part of the programme to equip them to understand the task ahead of them that must be accomplished. The workshop cumulated into the award ceremony for the grant. The resource person for the workshop was Dr Onyekwere Ojike, Technology transfer expert with the centre who exposed the awardees on the challenges and the need to properly protect their idea and equally how to reap from it. The session turn-out to be become very interactive as most of the awardees were exposed to the technicalities of the intellectual property for the first time. Thereby asking several questions which were properly answered to their satisfaction. The invitation letter for the workshop is as shown in Fig. 1. While the participants is shown in

https://acespedunn.edu.ng/about/dli-5.3-entrepreneurship/seed-grant-award-documents/59

ACE-SPED Professional Short Courses

The professional short courses are special workshop programme of the centre basically used as an outreach event to people of all class. The programme which was held between 1st and 5th July, 2024 attracted artisans, specialized professionals etc from surrounding communities of the centre. Some of the technology transfer topics handled included Management of Technology and Innovation, and Bioenergy for Youth Empowerment. The designs, construction parameters, methodologies of various technologies were taught and discussed. Equally, technology transfer and patent protection were discussed. The training afforded the

participants to share their views and challenges in the area of commercialization and technology transfer. The flyer for the event is as shown Fig. 2.
